

Company News February 2023

Our monthly selection of Solplanet news,
research innovations and industry news.

Happy Lunar New Year 2023

On Sunday, January 22, marks the start of the Lunar New Year and the Year of the Rabbit. In Chinese astrology, the rabbit symbolizes qualities like luck and success, and the year is expected to bring peace and harmony.

Our Solplanet teams all over the world are extremely excited to use the positive energy of the new year to continue to build on the success we found last year. We're excited to foster partnerships in new markets, continue to produce and distribute innovative solar energy equipment, and see even more Solplanet products installed in solar installations around the world.

Most importantly, we're excited to continue to build on our mission of solar for everybody.

Aquarius will help your business go green

Are you looking to evolve into a lean green business? Our new Aquarius commercial three-phase inverter - the ASW 75-110K LT - is now here to help you grow!

We are proud to introduce our powerful three-phase ASW 75-110K LT series, a flexible and reliable solution for high-efficiency commercial and industrial solar plants.

It's thin and it only weighs 85kg. It's IP66-rated to withstand harsh conditions and has C5 anti-corrosion protection. It also has an industry-leading 10 MPPT design (a perfect fit for 210, 182, and double-face counterparts).

This powerful commercial inverter will energize your business and harness the full power of the sun.

Check out the full series of Aquarius inverters on our [website](#).

Cut Your Energy Costs with Solplanet

Resolve to cut your energy costs (and help Mother Earth) by switching to solar energy - the most abundant energy resource on the planet.

Solplanet wants to help reduce your energy bills with our innovative and award-winning solar products. From single-phase and three-phase hybrid inverters to low-voltage batteries, data loggers, and even EV chargers - we have the products that can help you to harness the power of the sun and reduce your energy bills.

Visit [our website](#) to learn more about our energy mission and how we can help you keep more of your hard-earned money.

New Market

Ciao, Italia! Buongiorno!

We're thrilled to announce that our Italian office is up and running and ready to help the people of Italy harness the power of the sun to secure a sustainable energy future.

Solplanet's plan for the Italian market is already well underway. We're negotiating with distributors and sending out units to regional installers to test out. We plan to go big in Italy with everything from inverters for small residential installations to big and powerful commercial inverters.

Are you ready to be part of Italy's transition to solar energy?

We're ready for the Spanish sun!

In January, we announced our new partnership with Lumisolar and it's already heating up the Spanish solar market.

From compact inverters for small homes to tough and efficient inverters for commercial use - Lumisolar has all the innovative products Spain needs to power their future with the sun.

We look forward to growing our partnership with Lumisolar!

→ Are you in Spain and looking to switch to solar power? Check out [Lumisolar's website](#) for all the Solplanet products they have available.

Exhibition

Solar for everyone in Abu Dhabi

The Solplanet MENA Team excitedly took part in the World Future Energy Summit in Abu Dhabi from January 16th to 18th, and boy did we get a first-hand look at the latest development in the middle eastern renewable energy market!

A big thank you to everyone who visited our booth at the Summit and showed support for our mission to bring solar to everybody. We look forward to seeing you all again next year!

→ Did you miss the show? No problem! Get in touch with us today so we can tell you how Solplanet can help drive you toward a greener future.

New Technical Engineer in Spain

Say hello and mucho gusto to José Antonio Martínez, our brand-new Service Engineer for Spain.

José has some serious technical skills that are backed up by extensive experience in the industry. He's still settling in but he's already hard at work helping Spanish solar pioneers with their technical questions so that they can efficiently harvest the power of the sun using Solplanet's products. He's sure to be a great resource for all of Solplanet's customers in the Spain region.

Are you in Spain and have technical questions about our products? Get in touch with José and ask away!

Service

Call Centre Support Available in Türkiye

We've launched a brand new call centre in Türkiye that will always be there to answer our customers' questions and inquiries.

Supported by an experienced and dedicated team, our Turkish call centre will provide high-quality support for customers looking to install an award-winning Solplanet inverter and troubleshoot connection issues. Our call centre in Türkiye is just the latest way that Solplanet is showing its commitment to providing superior customer service.

Get in touch with our Turkish experts today and make sure you're getting the most out of your Solplanet product.

Solar Industry News

Are Floating Solar Farms in Our Future?

Floating solar farms are already being used in places around the world, but so far only on calm lakes. Scientists and engineers around the world are trying to figure out how to create floating solar farms that can easily power communities living onshore nearby while being tough enough to continue working in rough water.

Solar Industry news

Innovation Driving European Solar Renaissance

Europe is trying to reduce its dependence on Russian gas by investing in the renewable energy sector, specifically solar power.

To become more resilient and globally competitive, the region will focus on sustainable innovation projects that will re-ignite the solar power industry.
