## Huge Solplanet installation launches in Türkiye

The municipality of Kayseri in Central Anatolia, Türkiye, has just completed the installation of a massive solar project that will reduce the cost of powering wastewater treatment plants and protect the health of residents by investing in a green energy solution. And the huge solar array of over 13,000 solar panels is supported by a bank of 51 of our powerful and reliable Aquarius model three-phase inverters.

This installation is a new record for us - it's the largest installation of Solplanet inverters yet.

We're glowing with pride because we know that our high-quality inverters will help make the solar installation in Kayseri a problem-free energy production powerhouse.

More info on our [website](#).

## Solplanet and Alpinsun New power partnership

Our partnership with Hungarian solar installer, Alpinsun, just keeps growing and growing.

They've installed several hundred of our award-winning solar inverters and Solplanet is officially their first choice for high-quality, reliable single-phase, three-phase, and hybrid inverters.

We are incredibly grateful for their ongoing support and their trust in our products, and we can't wait to see where Solplanet and Alpinsun go next.

Teamwork makes the solar dream work!

## Solplanet inverters certified and available in Chile

We're excited to announce that six of our different ranges of solar inverters have been certified by the Superintendency of Electricity and Fuels (SEC) in Chile and will now be available for installation within the country!

They've all passed the rigorous testing requirements necessary to be sold to consumers.

Keep your eyes open for our ASW 3-6K S G2 series, ASW 3-20K LT G2 series, ASW 25-40K LT G3 series, ASW H S2 series, ASW H T1 series, and ASW 75-110K LT series - they'll be hitting the shelves in Chile soon!

## Brazilian installers love Solplanet inverters

Teo Neves from Abençoados Solar in Itapipoca, Brazil, loves installing Solplanet inverters and he's not shy about his reasons.

He loves our industry-leading warranties on our powerful and varied solar inverters, their outstanding reliability, elegant and discreet design, and the comprehensive support we offer our customers.

More and more of our popular solar products are available in Brazil all the time. Contact us today and we'll show you exactly which one of our award-winning solar inverters is the perfect match for your solar installation.

Let's keep going green, Brazil!

## A huge Solar installation for Bravilor Bonamat Polska

The harsh winter is behind us, but it has not prevented us from realising interesting investments for the industry. An example of this is a 50 kWp photovoltaic installation for the Bravilor Bonamat Polska plant in Bialystok, Poland. Grodno S.A. was a partner in this installation. Bravilor Bonamat is a standard-setting manufacturer of variety types of coffee machines and water brewers. It is a family-owned company that has been in operation for almost 70 years. During this time, the company has developed from a wholesaler of products for hotels and catering to a specialist and manufacturer, a designer, producer and supplier with an international image and ambitions.

## Solplanet's partnership with Australia's OSW – Going strong

One Stop Warehouse (OSW) is one of Australia's fastest-growing top 100 companies and they've even recently expanded into the European market to bring OSW solutions to solar inverters all over the globe. They carry everything you need for your solar installation - including all of our award-winning solar inverters.

Their knowledge and dedication have helped to push the Outback towards a cleaner and greener future and we could not be more proud of our partnership with this dedicated customer service-driven company. We look forward to continuing to expand with OSW and bringing solar power to even more people.

## Solplanet team shines at Solarex Istanbul

The Solar Energy and Technologies Fair "Solarex Istanbul" is Türkiye's first and only energy-themed fair. Because it brings together all members of the solar sector - CEOs, senior managers, purchasing directors, manufacturers, consumers, academics, students, and domestic and foreign representatives - this fair is an important event that pushes Türkiye closer and closer to being a solar production powerhouse.

We were thrilled to have Solplanet represented at this important solar exhibition and we want to thank each and every one of our partners, colleagues, and visitors for their continued support.

We will see you all at Solarex Istanbul 2024!

## Solar to be installed along Germany's autobahn

---

Within the next ten years, up to 200 TWh of solar power could be generated annually from photovoltaic installations running along Germany's autobahn network.

The project would have steel masts built every 15 meters along the sides of the motorways with PV modules hung between the masts.

The PV installations are intended to be a direct current system. A 110 kV high-current cable would run underground and a mains connection would have to be set every 9 to 87km.

## Solar Exceeds 28 GW in Brazil

---

Since the beginning of the year, developers in Brazil have turned on 2,111 MW of distributed-generation systems and 1,351 MW of centralized capacity. In only 100 days, the country has installed 3.46 GW of PV capacity, increasing the national total to 28.1 GW. About one-quarter of that capacity comes from large-scale plants with the rest coming from small solar parks under 5 MW.

If the country continues to install at this pace, the country's capacity will reach 7,705 MW by the end of the year.
